

*if you stare at a cowboy's face for long enough,
it turns into a sunset*

September 26 - November 16, 2025

The desert is not a void, as it is so often depicted—it is an active landscape with vibrational subtleties that reward deep listening and looking. For half a decade, Hannah Spector has been travelling to West Texas multiple times a year to listen to this landscape. Their exhibition at Women & Their Work, *if you stare at a cowboy's face for long enough, it turns into a sunset*, places queer bodies within a new mythos—one that turns against the hyperreal object of the American West as an imperial proving ground.

Featuring a multichannel sound and video installation, ceramic sculpture, and copper-plate etchings, Spector projects a new future—one that disrupts gender norms, power systems within language, linear notions of time, and limiting means of self-expression.

windbody, rainbody, 2025

Etching with ferric embossment
and chine collé, mahogany
artist-built frame, 1/2 Edition

25 ½ x 33 ¼"

\$1600 framed, \$1200 unframed
